## ELE Electric Height Adjustable Table Base

Elevate your space with the ELE electric height adjustable table is a great addition to any work space. Be at your best when you feel your best when you are working at the right height either sitting or standing.

- Height range- 3 stage 24.5"-50"
- 2 leg base structure with cross rails fits tops 40"-72" wide
- Foot depth 27" works for both 24" and 30" deep tops
- 3rd leg kit is keyboard friendly (no additional cross rails). May require additional mending brackets or anti sag bar if user is providing the work surfaces. Brackets and anti sag bar may be purchased from Collaborative Spaces
- Premium Anti Collision programming
- Programmable 4 position memory hand control with additional features
  - Program up to 4 unique desk height positions and activate with 1 touch control
  - Adjust the anti collision sensitivity level from the hand control
  - Set new low and high position stop points to avoid the table base from contacting file pedestals or shelves in your work space
- Weight rating 225 lbs 2 leg and 300 3 leg
- Speed 1.18" per second, with whisper quiet motors
- Individual motor in the top of each column
- Warranty 3 years on electronics and 10 years on structural components
